REMOTELY CONNECTING SMART PRODUCTS WITH SUPPORT AGENTS.

HOW REACH WORKS

The Reach Platform offers more control and insight than ever before by allowing remote support agents to troubleshoot and repair IoT devices and software.

An end user requests support using their mobile app to connect to a support agent. Reach support session is initiated. Utilizing the Reach web interface, the agent is able to:

SEE *As If You Are There*

Solve issues remotely

Enable Camera Access

to stream video and capture photos.

SHARE *Mobile Screen*

See what issues they see

Screen Share

mobile apps to troubleshoot in real-time.

REPAIR *Quickly Diagnose and Restore IoT Devices*

even if they can't connect to the internet.

Direct access and control of your customers' devices
